

CASE STUDY MATLOCK LIDO

Project: Demolition and Asbestos Removal - Matlock Lido
Client: Derbyshire Council
Date: March 2012 - April 2012

Creating the right impression in Matlock and showing sensitivity to the environment.

Following successful completion of the rather complex dismantling and demolition of the former Public Swimming Baths in Matlock, the Team from Ron Hull Demolition created much needed Car Parking facilities close to the Town Centre, in accordance with the Clients instructions.

The pictures provided shows the before and after results of the job.

The Project was completed on time, to cost and most importantly safely with minimum inconvenience to close proximity residents and businesses alike.

Ron Hull Demolition Ltd continues to set standards for others to follow.
