

## **CASE STUDY** DONCASTER MBC

**Project:** Demolition Of Fire Damaged Buildings  
**Client:** Campsmount Technical College  
**Date:** December 2009

It was the speed of our response on picking up news of the emergency to securing the opportunity to tender for this project just prior to the 2009 Christmas holidays that won us the contract.

We are one of a limited number of companies able to mobilise for such emergencies, and the ability to offer to clients a "one-stop" facility which provides the kind of reassurance that clients are looking for in these circumstances.

The fire damaged structures needed to be made safe; contaminated material and asbestos removed from site; and the site made secure over the Christmas holidays to allow mobilisation early in the New Year.

Preparation is everything, and the first objectives were achieved, minimising inconvenience to the college and students, who were in the process of taking exams.

The work was completed to time and cost, and the college routine returned quicker than expected due to our efforts.
